Art Unit: 1793

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The “enabling” disclosure is not commensurate in scope with the subject matter encompassed by the claims, in that the claims recite a process for producing “nitrogen fertilizer”, but only the production of urea is exemplified with no guidance provided as to how to produce “nitrogen fertilizers” other than urea. In re Borkowski, 164 USPQ 642.

Claims 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 7, lines 3 and 4, respectively, there is no clear antecedent basis for “the product” or for “the product stream”. It is also indefinite as to what such product or product stream would be.

The following changes would overcome these rejections.

In claim 1, line 1, “nitrogen” should be changed to - - urea - - . In line 3, before “product” the word - - urea - - should be inserted and after “product” the word - -

stream - - should be inserted. In line 4, before "product" the word - - urea - - should be inserted.
